

July 9-10, 2026

Global Pesticide JV & Toll Manufacturing Workshop

Come and meet Laurent Martel, CEO of Ag and board member of InVivo, a French farmer cooperative with USD 12 billion sales.

Mr. Laurent Martel - CEO of Ag and board member of InVivo

Laurent will be our Opening Keynote Speaker.

Join us to engage him. It's not easy to get him to attend and to speak at an international conference. We will make sure he will be present all day and at the gala dinner too on July 9. So you have plenty of opportunities to interact with him.

InVivo owns 50% of Life Scientific in Ireland which holds many generic pesticide registrations in Europe and it has entered the USA market recently. And looking at expanding into Asian markets soon.

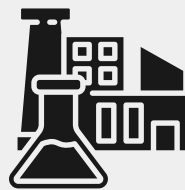

InVivo buys Euro 1 billion worth of pesticides a year for their cooperatives in France, in Europe in general and in Brazil.

In this JV & Toll Manufacturing Workshop, Laurent will share with us the business and vision of InVivo and their partially-owned Life Scientific pertaining to crop protection. He will also addressing the need for resilience in product supplies and manufacturing in light of current global turmoil.

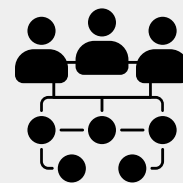

***Seats are limited to ensure high-quality interaction and executive-level networking.**
